

Volunteers Needed

for an Altitude Study

examining the effect of using erythropoietin and acetazolamide on physical performance and susceptibility to acute mountain sickness at altitude.

Who...

- ✓ Healthy, age 18-40
- ✓ Run at least 3x/week and run 2 miles in under 21 minutes
- ✓ Up to date on COVID-19 vaccination

Why...

- ✓ Help our Soldiers in the U.S. Army

What & Where...

- ✓ Two ~2 ½ hr sessions in the altitude chambers at the U.S. Army Research Institute of Environmental Medicine (Natick, MA)
- ✓ Reside for 15 days at the summit of Pikes Peak in Colorado
- ✓ Be willing to take a drug called Erythropoietin that is known to increase exercise ability at sea level
- ✓ Be willing to take a drug called Acetazolamide that is known to help with symptoms of acute mountain sickness
- ✓ Perform exercise
- ✓ Provide blood & urine samples
- ✓ 41 days over ~10 wks
